ENERGY ENGINEER / CONSULTANT

Ridgecrest Energy Advisors is unique in that we identify and implement energy reduction strategies at large commercial buildings, without capital improvements. As a division of a 21 year old Houston based consulting firm, Ridgecrest does not sell power, hardware, software or any products. We focus on optimizing the operation of existing buildings making them perform better and run 24% more efficiently on average. With a solid backlog of work, Ridgecrest has an immediate opening for a talented engineer with above average abilities to help us keep up with the rapid demand for our services.

The Energy Engineer/Consultant will work both as a team member and independently without supervision. Compensation and benefits consist of a competitive base salary, insurance, 401(k) and vacation, along with an attractive bonus plan based on realized savings for customers. Our philosophy has always been to compensate handsomely for exceptional effort and results.

KEY RESPONSIBILITIES:

- Independently evaluate complex HVAC and building automation systems to identify Energy Conservation Measures (ECMs) that can be implemented with existing equipment (non-capital)
- Conduct site visits to collect data from facilities
- Utilize spreadsheet and energy modeling tools to quantify savings potentials of ECMs
- Apply regression modeling techniques to develop energy baselines
- Develop detailed client reports and presentations with MS Office tools
- Implement and test ECMs at customer sites using combination of in-house and contractor staff
- Provide ongoing technical support to clients and ensure continued effectiveness of all ECMs
- Coordinate and manage onsite and offsite contractor time and productivity
- Participate in sales and technical presentations at all levels (C-suite to operations staff)
- Foster effective and positive business relationships with all parties throughout project phases
- Willingness to travel up to 50%

REQUIREMENTS:

- BS in Engineering (Mechanical, Electrical or Facilities). Combined work experience in facility management may be substituted for bachelors of engineering degree
- Experience operating a wide range of HVAC systems typically found in Hospitals, Hotels, Educational Facilities and Office Buildings
- Positive attitude and a proven ability to perform
- Excellent written and verbal communication skills

PREFERRED:

- Ideal candidates will have 2 or more years' experience in any one or more of the following areas: Facilities operations and management; Commissioning; Mechanical design; Control system design; Installation; Maintenance; HVAC testing and balancing
- Professional Engineering (PE) License
- Certified Energy Manager (CEM) from Association of Energy Engineers, or similar, would be a plus
